
GLOBEStyle

Team Members: Joseph Torano, Jess Farmer, Alyssa Marcoux, Gurkirat Kainth

Faculty Sponsor: Philip Bernhard

Client: Institute of Cross Cultural Management

Milestone 3 Matrix

Task	Alyssa	Jess	Joseph	Gurkirat
Get access to server	25%	25%	25%	25%
Access country data through website	30%	20%	30%	20%
GLOBEStyle app compiled with Sekai code and adjusted with GLOBEStyle features and connections	35%	15%	35%	15%
Continue work on Database structure(i.e. how to handle calendar)	50%	13%	24%	13%
Framework for Calendar & pre and post reflection questions.	25%	25%	25%	25%
Create a Demo for the end of the semester.	15%	35%	15%	35%

Milestone 3 Matrix Accomplishments

Task	Alyssa	Jess	Joseph	Gurkirat	To Do
Get access to server	25%	25%	25%	25%	
Access country data through website	10%	5%	10%	5%	Connecting to database
GLOBEStyle app compiled with Sekai code and adjusted with GLOBEStyle features and connections	30%	10%	30%	10%	Add in Profile Creation Questions
Continue work on Database structure (i.e. how to handle calendar)	30%	10%	25%	10%	getting access to server database organizing structure to merge databases
Framework for Calendar & pre and post reflection questions.	25%	25%	25%	25%	
Create a Demo for the end of the semester.	15%	35%	15%	35%	
Integration old website code into new website	10%	5%	10%	5%	getting all code off server and learning how to run it locally

Milestone 3 contribution of each team member (Jess Farmer)

- Worked on GLOBEStyle App-Code, implemented a button that leads to a calendar display.
 - Assisted with discovery of finding the location of the database and website files off of the server by talking to members from the group who worked on the project before us and some researching.
 - Met with clients to give update, discuss profile questions, as well as pre/post questions. Waiting for them to get back to us.
 - Put in place dummy questions temporarily for profile questions.
 - Met with IT to learn how to get database and website files from Sekai off of the server
-

Milestone 3 contribution of each team member (Alyssa Marcoux)

- Assisted in discovering location of website code and database on server
 - Figured out how to download files from server
 - Researched concept ideas for calendar and how it possibly needed to be integrated with database
 - determined that will likely be unnecessary to save calendar data to the database
 - Investigated structure of old database
 - started planning integration of new database with existing database.
 - Met with clients to give status update and get data from them.
-

Milestone 3 contribution of each team member (Joseph Torano)

- Helped discover location of website and database code
 - Worked with IT to learn how to download files from folder and how to change permissions
 - Met with clients to discuss features get updates on status of questions for both calendar and profile
 - Investigated old website code to see if it is viable to create new website from it
 - Found it was viable and began creating a new version of website using code from last semester to ensure better integration with database
-

Milestone 3 contribution of each team member (Gurkirat Kainth)

- Worked on implementing the calendar feature to the app
 - Calendar view added
 - Worked on adding functionality to the calendar view
 - Adding events
 - Notifications with pre and post reflection questions
 - Met with IT in order to gain access to Sekai server
-

Milestone 4 Goals

- Integration of old website code into new website
 - Access country data through website
 - GLOBEStyle app compiled with Sekai code and adjusted with GLOBEStyle features and connections
 - Continue work on Database structure (ie how to integrate into old database)
 - Framework for pre and post reflection questions.
-

Milestone 4 Matrix

Task	Alyssa	Jess	Joseph	Gurkirat
Integration old website code into new website	35%	15%	35%	15%
Access country data through website	35%	15%	35%	15%
GLOBEStyle app compiled with Sekai code and adjusted with GLOBEStyle features and connections	15%	35%	15%	35%
Continue work on Database structure (ie how to integrate into old database)	35%	15%	35%	15%
Framework for pre and post reflection questions.	15%	35%	15%	35%
